SECURITY DOORS 

ThermAll

by Effepi Security Doors:
la porta in alluminio
a taglio termico

CATALOGO 2026

Nel 1979 Franco Paolucci ha creato BLINDATO EFFEPI SRL con il preciso scopo di operare nel settore delle chiusure blindate e di sicurezza. Blindato Effepi si è da subito contraddistinta come azienda impegnata sul fronte della ricerca e dell'innovazione. La qualità è uno dei principi della evoluzione e della filosofia aziendale.

BLINDATO EFFEPI, azienda con una lunga storia di primati e di ricerca nel settore delle porte blindate, ha introdotto, attraverso la ricerca ed il design, la cura e la caratterizzazione formale delle porte blindate e dei suoi accessori; ha migliorato le caratteristiche tecniche dei prodotti con numerose innovazioni e brevetti.

Negli ultimi anni i cambiamenti climatici hanno reso sempre più evidente l'importanza di abitazioni capaci di garantire non solo sicurezza, ma anche comfort termico ed efficienza energetica. Temperature estreme, umidità, vento e piogge intense richiedono ingressi altamente performanti, in grado di proteggere la casa e allo stesso tempo contribuire al risparmio energetico quotidiano.

Per rispondere a queste esigenze, Effepi Security Doors amplia la propria proposta con ThermAll, la nuova linea di porte in alluminio a taglio termico progettata per coniugare sicurezza, design ed elevate prestazioni energetiche in un'unica soluzione.

Grazie alla sua struttura robusta e alle eccellenti prestazioni isolanti, ThermAll by EFFEPI riduce la dispersione termica, migliora il benessere abitativo e aiuta a contenere i consumi legati al riscaldamento e al raffrescamento. Una scelta responsabile, sostenibile e attenta al clima in cui viviamo. Con ThermAll, Effepi conferma la propria visione: unire protezione, design e tecnologia per proporre porte che rispondono alle esigenze del presente e alle sfide del futuro.

In 1979, Franco Paolucci founded BLINDATO EFFEPI SRL with the specific purpose of operating in the armored and security door sector. Blindato Effepi immediately distinguished itself as a company committed to research and innovation. Quality is a cornerstone of the company's evolution and philosophy.

BLINDATO EFFEPI, a company with a long history of leadership and research in the armored door sector, has introduced, through research and design, attention to detail and a distinctive style to its armored doors and accessories. It has improved the technical characteristics of its products with numerous innovations and patents.

In recent years, climate change has increasingly highlighted the importance of homes that guarantee not only security, but also thermal comfort and energy efficiency. Extreme temperatures, humidity, wind, and heavy rain require high-performance entrances that can protect the home while also contributing to daily energy savings.

To meet these needs, Effepi Security Doors expands its offering with ThermAll, the new line of thermally insulated aluminum doors designed to combine security, design, and high energy performance in a single solution.

Thanks to its robust structure and excellent insulating performance, ThermAll by EFFEPI reduces heat loss, improves living comfort, and helps reduce heating and cooling costs. A responsible, sustainable choice that respects the climate we live in. With ThermAll, Effepi confirms its vision: combining protection, design, and technology to offer doors that meet the needs of the present and the challenges of the future.
